

## I can help

You can transfer money to the general account of the fund with a note Charitable Contribution. In such a way, you help a person who is most in need of the help. Exactly from general money of the fund emergency operations are paid and life-saving medicines are purchased. For example, when parents of a child apply to the fund requiring urgent help, and there is no time to wait until money are collected. General money is also spent for potable water, auxiliary therapy preparations, and many-many other for all patients of the oncological department of the Russian Children's Clinic Hospital. Therefore, money transferred with a note Charitable Contribution is most effective.

## Other options of help:

### Targeted help

You can help a certain child. On our site, we publish photos and histories of children who need in payment for expensive treatment and in financial support. You can transfer money to a savings bank book of parents of the child you want to help or transfer money to the account of the fund specifying the name of the person whom the contribution is intended for. If desired, you can visit a child in a hospital or talk with his parents by phone.

### Charity instead of souvenirs

Definitely, you are thinking now what you are going to present to your employees and partners for the New Year holiday. Mugs? Pens? Maybe, daily planners? Everything with a company logo! Excellent!!! At once, you may recall a pile of boxes in the room, additional expenses for couriers to deliver all that. And then, they start presenting the same to you ... two dozens of pens, daily planners, calendars ... Whatever cynical it is, but on one side there are calendars and mugs gathering dust, and on another side - a saved life of a child.

We would like to offer you to participate in conjunction with our fund in the project Charity Instead of Souvenirs and to transfer your "New Year budget" for treatment of children suffering from oncological and oncohematological diseases. The initiative coordination in Russia is performed by Charities Aid Foundation (CAF) - a non-profit organization that renders assistance to charitable organizations and those supporting them.

It is a unique chance for our fund to provide children with much needed medicines and technologies. There is no minimum contribution or minimum amount. Everything depends on possibilities of your company, and the intention itself is important to transfer your souvenir budget to charity.

Instead of your contribution, we offer an alternative to corporate gifts in the form of souvenirs and fantastic children's greeting cards that you can present to your partners for the New Year instead of dull stationeries. Greeting cards will contain the information where the "New Year budget" of the company was sent, an invitation and gratitude for understanding.

It is more important to present acts of kindness instead of ordinary souvenirs.

If you want to participate in the project, contact us!
